

PLANET SYSTEM FOR DESK RESERVATION Eng Serbia

How-to short manual

General remarks:

- System is intuitive to use
- Every employee is to make a booking for herself/himself
- Bookings are based on choosing seats in mapped areas on ground or mezzanine level
- Options for bookings are: *morning*, *afternoon* or *both* for the day
- Upon successful booking, system sends confirmations in inbox
- Every employee must check-in and check-out **once in the office or prior to leaving the office; check-in/out can be done only from the office, not remotely**
- System automatically recognises our location as *Belgrade office*; Eng guests would typically use location option: *Agile* (as in being on travel, outside of their office seat) and, with that option chosen, would follow the exact same steps
- **If not checking in during the first hour or reserved slot, system cancels the reservation** and sends that cancellation alert in inbox

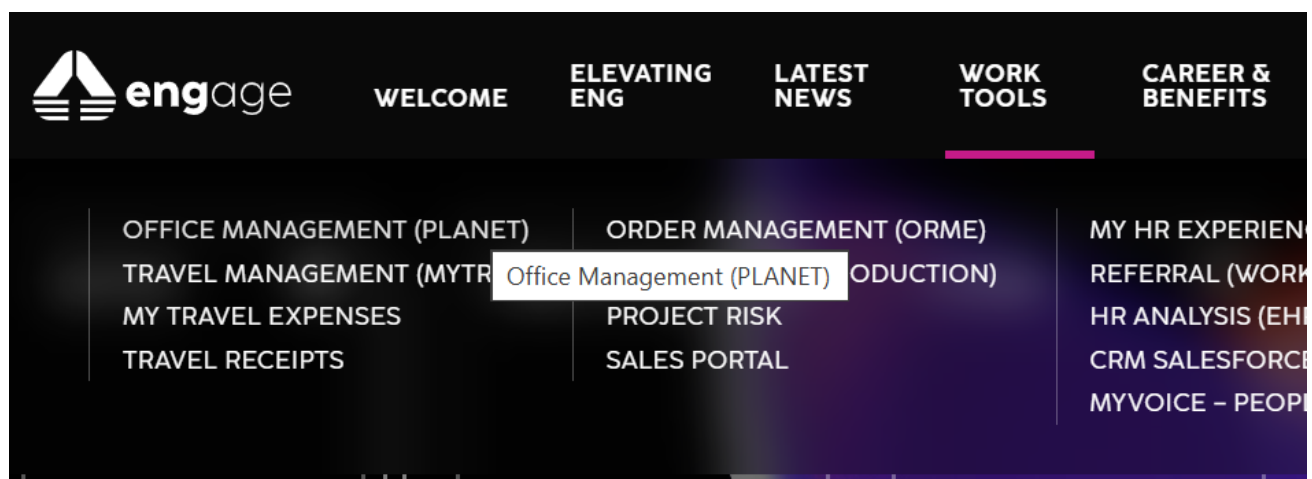

Reports:

- Office presence reports will be regularly run by HR Admin
- These reports will be used also for payment of increased meal allowance, for every working day spent in the office (minimum six hours)

Details:

Location

Easiest way to reach Planet is via Engage, following the path as in a screen shot below:

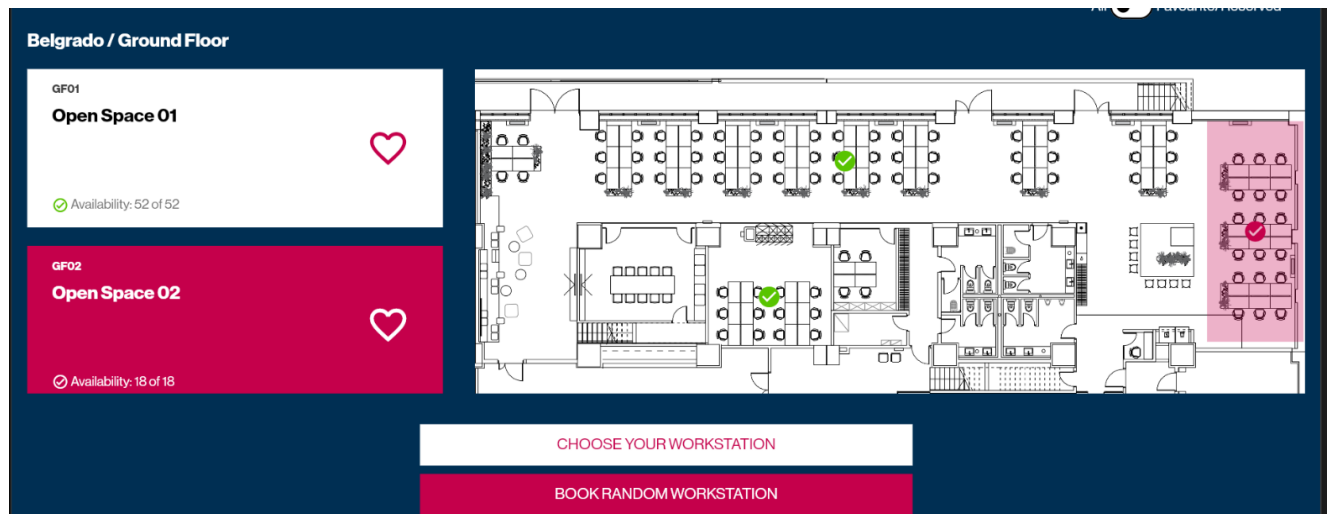

Log-in page is as per below:

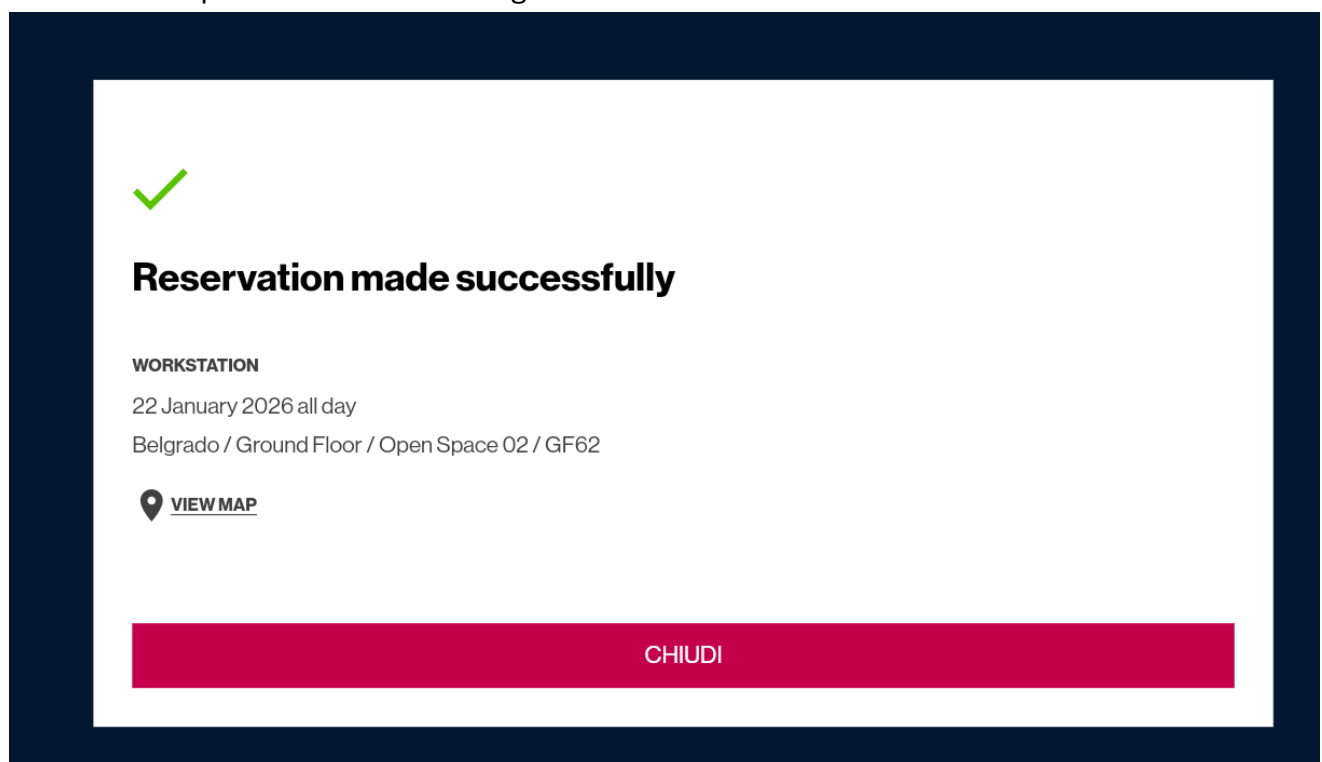

Once: Book a workstation is chosen, below screen opens up; once When? is being chosen, Select field becomes active and should be clicked on

Once this is done, below screen appears:

Once choosing (ground floor in this example), seat map shows up; once Open space area is chosen (on the left) that area is highlighted; clicking on that area gives options to choose the actual seat of one`s preference, providing it is available;

Final screen upon successful booking is the one below:

Once process completed, the message below arrives in inbox:
